

Steps for Purchasing a Domain Name From GoDaddy

1. You can search for domain names and domain name ideas using Bustaname.com
2. Once you have decided on your domain name, go to <http://GoDaddy.com>

3. Enter in the domain you would like to purchase into the 'Express Buy' bar (black box) towards the top of the web page.
4. Click on 'Go!' GoDaddy will tell you if the domain is available or not with a green tick or red a cross.
5. Click 'Add' next to the domain name at the top of the page.
6. Towards the middle of the page you will find another button 'Continue to Registration', click this button. Do not add any extras, such as hosting etc. as you should be using your HostGator.com web hosting account to host your new domain.
7. If you already have a GoDaddy account, login with your username and password. If not complete the form on the right-hand side of the page and click 'Continue'.
8. Next select the registration length from the drop down box. (How long you would like to register the domain name for).
9. Select whether you would like a 'certified' or 'uncertified' domain. (Uncertified is usually fine).
10. If you already have hosting, set your domain name servers here also, by clicking on 'Set Nameservers'. Enter in at least 2 nameservers.
11. Click 'Continue'.
12. Next select the privacy protection for your domain name according to whether you would like your information that is attached to the domain name (such as your name, address and email address) to be public or private. Private registration will cost more.
13. Click 'Continue'.
14. There is no need to add any extras to your order again. Just click 'Checkout' at the bottom of the page.
15. Review your shopping cart, making sure you have spelt the domain correctly and that no extras have been added that you do not wish to purchase.
16. Once you're sure everything is correct. Select your payment method and tick the check boxes after you have read the terms of service and domain registration agreement.
17. Complete your payment information and click 'Place Your Order'.
18. You should receive 2 emails, an order confirmation and a domain registration confirmation.
